FBI—For number, call INFORMATION

Printed in

listen a moment to make certain that the line is not in use. If the line is being used, replace the receiver carefully and wait a few minutes before attempting to make your call again.

If the line is available, you should soon hear a steady humming sound . . . hum-m-m . . . the dial tone. Be sure to listen for the dial tone before dialing, otherwise you may get a wrong number.

If you do not hear the dial tone immediately, please wait for it, as the dial tone is the signal that indicates the equipment is ready to handle your call. Then dial each figure of the number you want in order, permitting the dial to return without interference. If the return of the dial is slowed or speeded up, it may result in a wrong number.

ring, unless the line is busy. The ringing signal will be heard in the receiver as a burr (pause) burr (pause). If the line you called is in use, you will hear the "busy signal", a buzz-buzz-buzz sound.

If your finger slips from a dial opening, or you make any other error while dialing, hang up and, after waiting a moment, listen for the dial tone and dial again.

If you have received no answer after dialing a number at intervals and you believe an answer should be obtained, dial "0" and ask the Operator for assistance in reaching the number.

Whenever your telephone number is requested on a call, give both the name of your exchange and your number.

WHEN AN EMERGENCY REQUEST INTERRUPTS YOUR CONVERSATION PLEASE HANG UP QUICKLY

If your party-line neighbor comes in on the line and says, for example, "My house is on fire", please give up the line without delay. Remember, it may mean the saving of both life and property.

CALLS TO A PARTY ON YOUR LINE

WARREN

If your telephone rings immediately after you have received a busy signal and hung up, you probably have called a party on your line.

When your telephone stops ringing, it's a signal that your party has answered. Lift your receiver and begin your conversation.

If the ringing does not stop within about one minute, it is probable that the called party is not available. To stop the ringing, lift your receiver and replace it.

TO MAKE A LONG DISTANCE CALL TO THESE NEARBY POINTS

Calls to the Nearby Points listed below are handled by your local operator. To place a call, give the exchange name and the desired number to her. If the call is to be a Person Call, give the name of the person to whom you wish to speak.

If you do not know the number, ask the operator to connect you with the Information Operator at the point you wish to call. After obtaining the number, place the call with the operator.

DETROIT DISTRICT EXCHANGE

The entire territory represented by the map shown on this page is known as the Detroit District Exchange. The Center Line and Roseville Exchanges are Zones of the District Exchange. Calls between these zones and to the other zones shown on the map are intercome calls.

Intercome calls are charged for on a "Message-Unit" basis, the message-unit being a method of measurement. Factors such as length of conversation and the distance between the two points determine the number of message-units to be charged on such a call. With Extended Area Service certain intercome calls can be made without additional charge (see Extended Area Service on Page 5).

Lift the receiver and listen a moment to be sure someone is not in use. If the line is busy, replace the receiver carefully and wait a few minutes before trying again. Remember, tempting to make your call sooner may only delay it.

If the line is available, you will hear a steady humming sound, called dial tone. Be sure to listen for dial tone before dialing, otherwise you may get no number.

If you do not hear the dial tone, please wait for it, as the delay sometimes indicates the equipment is busy with another call. Then dial each figure of the number in order, permitting the dial to complete each revolution before dialing the next figure. If the number you call is busy, or if you reach the wrong number, hang up and dial again, speeded up, it may result in a wrong connection.

WHEN YOUR C

If your telephone rings and you answer but receive a busy signal, it means that the party you have called a party or is using the telephone.

When your telephone rings and you answer but receive a busy signal, it means that your party has answered another telephone.

TO MAKE

Calls to the Nearby Area are handled by your local operator. She will give the exchange name and number you want to her. If the call is to a number in the name of the person to whom you wish to speak, tell her.
